

Please don't hurt small ISP's like Sonic.net.  
They have the BEST service ([dslreports.com](http://dslreports.com)) which is  
far superior to SBC, even though they use SBC's lines.  
It's bad enough that CLEC's were a total failure, and that  
I have to pay for local voice service I don't need just  
to get DSL from SBC. Don't squeeze out my ISP and ruin it all.
